NO PROBLEM PRESENTATIONS

Choose a topic.

- What are you interested in?
- What might others find helpful?
- What do you know about or could you research?

Investigate the topic and take notes.

- Remember to think about where to get VALID information about the topic.

Organize your notes.

1. Introduction: Tell what you are going to do or say in the presentation and why.
2. Body: Explain, show and demonstrate the details in an order that makes sense.
3. Conclusion: Repeat the main points of the presentation and ask if there are any questions.

Choose props or make a poster.

- These items help illustrate your ideas and make your presentation interesting.

Practice, practice, practice.
