

A-H The Power of YOUTH

This 4-H Clover Kid activity
is supported and funded by:

IOWA STATE UNIVERSITY
University Extension

Today your Clover Kid explored sound. We worked on the science skills of observation and experimentation to discover how sound travels and used that information to discover how phones work. Ask your child about:

- ☘ How they held the string to get their telephone to work right. How do real telephones work?
- ☘ What song they played on our crystal piano?
- ☘ How they were able to hear their heartbeat through the funnel? How do doctors hear patients' heart beats?

Thanks for bringing your Clover Kid to the group today! We look forward to seeing you next time!
