Create Your Own 4-H Project!
Leader Guide

How YOU can help youth create their own 4-H projects

1. Read through the entire publication, “Create Your Own 4-H Project!” (4H 696)
   Yes, we know that sounds obvious, but you’d be surprised how many people skip this important step. Also, this project guide is designed to be different from other project guides that you might be familiar with using.

2. Clarify in your own mind the difference between a “project” and an “exhibit.”
   They are NOT the same thing. (Check the glossary if necessary.) Be prepared to repeat these differences to the youth.

3. Review basic learner-centered techniques.
   Youth (and adults) can be taught in several ways:
   • Tell them what you want them to know.
   • Show them what you want them to know.
   • Involve them in doing activities from which they will learn what they need to know.

   Simply telling youth what you want them to learn is the fastest teaching method, but the information is more easily forgotten. Learners may remember more if you show and tell them because they both see and hear the instruction. Getting youth involved in an activity takes more time and effort, but they will learn more and remember what they have learned longer.

4-H has a long history of “learning by doing.” Experiential learning happens when a person gets involved in an activity, looks back at the experience critically, determines what was useful or important to remember from the activity, and uses this information in doing something else. Most youth (and adults) find that the “doing” and “reflecting” steps are usually easiest while the “applying” step offers more of a challenge.

Experiential learning is more than doing activities. It involves discussing what was done (what), thinking about what was important about what was learned (so what), and applying new skills and information to a real life experience (now what).

Experiential Learning

DO
1. Experience the activity

REFLECT
2. Share the results, reactions and observations publicly
3. Process by discussing, looking at the experience; analyze, reflect

APPLY
4. Generalize to connect the experience to real-world examples
5. Apply what was learned to a similar or different situation; practice
The following chart may help you focus your efforts in helping 4-H members reach their goals through the “create your own” project.

<table>
<thead>
<tr>
<th>Steps in the members guide</th>
<th>Type of activity</th>
<th>Activity description</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-6</td>
<td>Doing</td>
<td>1. Decide what is going to be done &lt;br&gt;2. Set a timeline &lt;br&gt;3. Decide how it will be done</td>
<td>These are the three steps of goal-setting.</td>
</tr>
<tr>
<td>7-8</td>
<td>Reflecting</td>
<td>Evaluate the process and determine how to share what was learned</td>
<td>Remember that the goal of the shared exhibit or presentation might be different from the project goal, and that’s okay.</td>
</tr>
<tr>
<td>9-10</td>
<td>Applying</td>
<td>Transfer what was learned</td>
<td>Learning doesn’t require successes. 4-H is a safe place to make mistakes, admit them, and learn from them. Ask questions to help the young person clarify or compare what was learned (about the project, about himself or herself, or about a skill) to the “real world.” For example, where else might the youth use the research skills practiced as part of this project?</td>
</tr>
</tbody>
</table>

4. **Consider what your role should be for each specific child.**

In some instances you may be qualified to be the subject expert. If so, share your enthusiasm and try to teach through hands-on participation.

In other situations you may need to play the supportive facilitator and coach role. This could involve chauffeuring, Web surfing (and evaluating), making preliminary phone calls and/or finding phone numbers, taking photos, tape recording or videotaping interviews, teaching (or reviewing) library search skills, listening to frustrated rantings and ravings, sharing personal experiences related to failures and successes, offering encouraging words and notes.

5. **Get help.**

If you are asked a question that you can’t answer, admit that you don’t know and offer to help find someone who does.

6. **Take a deep breath, smile, relax, and ENJOY.**

Remember, this is their project, not yours. (Although if you’d like to try something new or learn something new, this process also will work for you!)

Prepared by Judy Levings, Extension youth development specialist; Sue Bogue, Extension program specialist; Wendy Brock, Extension youth development specialist; Diane Nelson, Extension communication specialist; and Jane Lenahan, illustrator and graphic designer, Creative Services, Instructional Technology Center.

… and justice for all

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Many materials can be made available in alternative formats for ADA clients. To file a complaint of discrimination, write USDA, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call 202-720-5964.
