For the Iowa 4-H Robotics Challenge Event, August 10th & 11th 2014, our club has received:

____ One Lego Mindstorms® NXT robotics kit

We understand that these materials do NOT belong to us, and that we are responsible for treating them and the 4-H Exhibits Building facilities with care and respect.

We agree to return these materials in the same condition we received them to the E-SET program at the end of the Event. We will replace all toolkit tools to their proper holders. We will return all LEGO® parts to their proper holder. We understand that we will not be allowed to leave the exhibits building until the pieces of these kits have been properly put away, any missing pieces documented, and the kits checked by event staff.

We will report any missing, damaged, or nonfunctioning parts to the technical advisors as soon as we become aware of the problem. Technical advisors will provide replacement parts for any missing, damaged, or nonfunctioning parts for the Challenge Event.

We understand that the NXT robot is **NOT** ours to keep and will be disassembled and returned to the E-SET program.
