

These are hay prices paid at auction in the recent past weeks. Much of the price information is obtained from USDA Hay Market News. Personal contacts of local Iowa hay auctions secured price information for these market outlets. Auctions were chosen to reflect prices across Iowa. Other nearby auctions may exist. No endorsement of the listed auctions is intended.

The USDA Market News group uses the following hay classification designations in their market price reports. Of all hay sold, 1% or less would be designated in the supreme class. There is a general relationship between visual characteristics and forage analyses. If possible, the following Hay test analyses ranges (on dry matter basis) should be used to establish the appropriate quality designation. When feeding livestock, sample all forage lots and use forage analysis information for balancing livestock rations.

* Alfalfa & alfalfa with up to 10% grass (USDA)** The 'Supreme' category is not appropriate for grass hays Visual hay quality descriptions used in the USDA Hay Market News. (Note: these visual traits do not necessarily equate to the forage analysis ranges listed in the previous chart.)

Supreme

Very early maturity, pre-bloom, soft, fine stemmed, extra-leafy. Factors indicative of very high nutritive content. Hay is excellent color and free of damage.

Premium

(dairy quality) pre bloom or very early bloom legumes, grass vegetative, generally green with no rain damage

Good

(dairy and feedlot quality) early to mid-bloom legumes, grass vegetative or very early head, generally no rain

Fair

(feedlot or beef quality) mid- to late-bloom legumes, grass headed, coarse/stemmy, may show some rain damage

Utility

(formerly 'Low') - very late maturity, or very coarse/stemmy, or considerable discoloration or rain damage

Internet-based Hay Source possibilities:

The **USDA Farm Service Agency (FSA)**, responded to drought-induced hay and pasture deficit conditions by its establishing a www website - **Hay Net** - for producers to list information concerning the need for hay or the availability of hay. The WWW link to this site is listed below.

Using the USDA Hay Net page is not as user-friendly as the earlier version. If you want to see the listings 'for sale', In the center-right 'box' on the page, select the line 'Access eHayNet Service'. That will take you to the 2nd page where you must choose either: NEED (hay ads) or HAVE (hay ads). Then a 'state' (the state where the hay is listed,). The 'Select' button will then take you to the listings for that state. Contacts and a limited description of hay available or needed can be found. As with other 'hay list'-type www sites, price and details about sales transactions must be completed between buyer and seller. Note: Not all lots listed for a state are located in that state, approximately half are from other states and Canada

IOWA HAY & STRAW DIRECTORY

The Marketing Division of the Iowa Dept. of Agriculture and Land Stewardship publishes a Hay & Straw Directory each Autumn. It includes names & contact information for hay sellers, hay brokers, auctions, commercial grinders, hay market associations, etc,. They are taking new listings anytime and post them on the WWW Hay and Straw Directory site. Clients are encouraged to use the WWW site. A few printed booklets may be available, but may not be as 'up-to-date' as is the WWW site version. Phone 1-800-383-5079 or (515) 281-5993 for information, or their WWW site:

Bid-4-Hay http://www.bid4hay.com/index.php?a=28&b=142&redirect_check=4

Operating in Oklahoma. It is an online hay classifieds and auction listing service. Allows listing and searching for hay. The interactive 'search' engine asks for your Zip Code and the distance range that you would like to search in. On 30 November, 2010 there were 0 listings for hay within 300 miles of Ames Iowa.

Internet Hay Auction

Midwestern Cattle Marketing, LLC (a Sidney, NE, company specializing in video cattle auctions) has established a www-based hay auction patterned after eBay. It can be found at eHayAuctions.com. Sellers register, provide descriptions of their hay (photos and test results are optional), set prices and establish auction timeframes. Potential buyers also register, then bid on hay until the price is met, the seller accepts a bid or the auction time lapses. Sellers remain in control of their hay until payment is made and hay is transported by the buyer. A fee of \$4/ton is paid to the auction company by the seller at the time of listing. On 30 November, 2010 there were no active auctions.

Agri Hay Exchange <http://www.agrihayexchange.com/hay/haylistings.aspx?ltID=2>

Operating out of Pennsylvania. It is an online classified listing. It allows for free searching for hay etc. but requires registration on the site. There is a subscription fee for hay wanted and for sale listings on the site, and to advertise.

On 30 November, 2010 there were 3 listings for Iowa.

The 'Hay Barn' <http://www.haybarn.com/reports/showads.asp?category=Hay>

Hay listings are grouped by state. Sellers list type, description, sometimes price, and telephone number.

The Haymarket <http://www.case-agworld.com/cAw.HM.html> The 'main page' has a lot of information. About 1/4 of the way down the page are some 'www links' to hay-related listings by 'region of the country'. This leads to various formats of hay listings.
