In addition, the many commercial exhibitors welcome you to visit their displays during the Junior Fair.

Health Requirements for Exhibition of Livestock, Poultry, and Birds at a County 4-H/FFA Fair

ANY EVIDENCE OF WARTS, RINGWORM, FOOT ROT, PINK EYE, DRAINING ABSCESSSES OR ANY OTHER CONTAGIOUS OR INFECTIOUS CONDITION WILL ELIMINATE THE ANIMAL FROM THE SHOW.

No individual Certificate of Veterinary Inspection will be required on animals or poultry exhibited at a County 4-H/FFA FAIR, but the animals must be inspected when unloaded or shortly thereafter by an accredited veterinarian. Each show must have an official veterinarian.

Quarantined animals or animals from quarantined herds cannot be exhibited.

Swine exhibitors at county fairs that do not require a Certificate of Veterinary Inspection, **must sign and present** an owner affidavit that the animals being exhibited did not originate from a quarantined herd and to the best of their knowledge, swine dysentery has not been in evidence in their herd for the past 12 months.

All swine exhibited must be accompanied by a record of a negative pseudorabies test, the test having been performed within 30 days prior to show, for swine originating from a Stage 4 or lower status county subject to 64.35(2). **No pseudorabies testing is required for swine originating from a Stage 5 county (Iowa is Stage 5).**

Swine returning from an exhibition to its home herd or moved to a purchaser's herd, following an exhibition or consignment sale, must be isolated and retested negative for pseudorabies not less than thirty (30) days and not more than sixty (60) days after reaching the swine's destination. (Code of Iowa 166D.13(2)).

Exceptions:

A. No testing is required for swine at an exhibition that involves only market classes, provided all swine are consigned directly to a slaughter establishment from the exhibition. The site that the swine originate from must have a current monitored status in order for the swine to be transported to the fairgrounds (statistical testing completed within the last 12 months or originate from a site in Stage III or higher area). Swine leaving the exhibition from a market class must be consigned and moved directly to a slaughtering establishment.

B. If counties have a split show and the breeding animals are exhibited and returned home before the market classes arrive, it will not be necessary to have a test record on the animals showing in the market classes; however, market class animals must have a current monitored status in order to be transported to the fairgrounds.

Sheep and Goats

All sexually intact sheep must have an individual Scrapie Flock of Origin identification tag. All sexually intact goats must be identified with an individual Scrapie Flock of Origin identification tag or by an official tattoo registered with USDA (to register, call 1-866-USDA-TAG).

Poultry and Birds

All poultry exhibited must come from U.S. Pullorum-Typhoid clean or equivalent flocks, or have had a negative Pullorum-Typhoid test within 90 days of public exhibition and the test must have been performed by an authorized tester.

However, "Market Classes" of poultry consigned to a slaughter establishment are exempt from the Salmonella testing requirements. "Market Classes" of poultry must be separated from all other poultry by a distance of ten or more feet and/or an eight-foot high solid partition.

Dogs and Cats

All dogs and cats exhibited must have a current rabies vaccination certificate.
