

## Discussion Centers

There will be four discussion centers for the remaining part of each session. Each discussion center will feature two speakers who will give comments about their operation, equipment, etc. This will also be a time for discussion, questions, and debate. Bring your questions!

Every half hour attendees will have the option to move to another center and participate in a different discussion or they may stay at the same session to continue.

Your Choice!!

Centers

## Palle Pederson

### *ISU Extension Soybean Specialist*

Pedersen is an Assistant Professor and an ISU Extension Agronomist that specializes in soybean production and management. He joined Iowa State University Faculty in 2003, coming to Iowa from Wisconsin. Palle is originally from Denmark.

Palle will be discussing how soybean growth and development responds to no-till growing conditions, and will discuss management practices that can help to make it work.

He also will review no-till soybean research he has been conducting in at several Iowa sites during the past two growing seasons.

**Cost: FREE courtesy of our sponsors!**

## Discussion Break-Out Centers

- Chad Martin  
.... More discussion about carbon credits and how to use them
- Alan Bennett– Galva ( no-tiller)  
Joel DeJong—ISU Extension  
Field Agronomist  
This group will look at managing soil fertility in no-till.
- Nate Ronsiek—Hawarden (no-tiller) & Dana Sleezer—Aurelia (strip tiller)  
This group will focus on managing manure in high residue systems. Nate is utilizing feedlot manure, Dana is using liquid swine manure.
- Mike Willer—Lawton (one pass no-tiller)  
Roger Susie—Kingsley (strip-tiller) AM only  
Tom and Jim Wagner—Calumet (strip-tillers) PM only  
This group will focus on how these systems have found a home on their farm and what they have done to make it work!
