

Ear Notching Guide

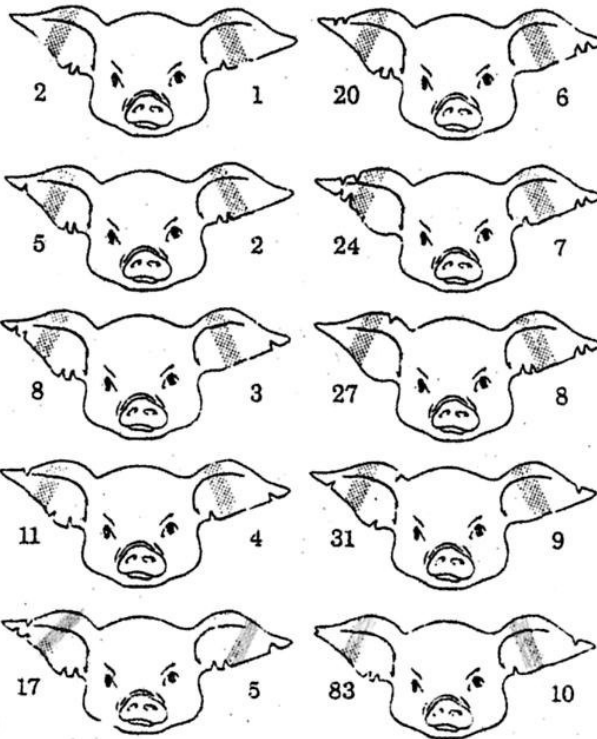

Right ear is
litter number.

Left ear is
pig in litter.

1. Take full notch in baby pig's ear so notch will not grow shut.
2. Notching pigs as soon as possible after farrowing will prevent errors.
3. To avoid mistaking a "3" notch for a "1" notch (or vice versa), do not notch in shaded area of ear.

Litter No. Pig No. Litter No. Pig No.

**This scheme will identify
161 litters.**
