Labor Force

The labor force in an area consists of all persons aged 16 or older who either are currently employed or actively seeking work. The number employed reflects the number of labor force participants in the county who currently have jobs (whether or not it is the job of their choice). The employment rate is the percent of labor force participants who are employed.

Employment and Earnings by Industry

The employment data in Tables 3 and 4 represent employment by place of work rather than place of residence. This means that the information is based on the jobs located within the county, whether or not county residents fill those jobs. As a result, county residents who commute to jobs outside their county of residence are not counted in these figures, but non-county residents who commute into the county for work are counted.
