Who Should Attend
Any Iowa manufacturer who has an interest in learning Theory of Constraints concepts. Appropriate for strategic-level personnel and/or their direct reports: organizational, divisional, and functional leaders; individuals responsible for implementing and guiding major initiatives; and internal change agents.

Discover
• A business management approach that identifies and manages the constraints in your business limiting your ability to achieve your goals
• Common approaches for applying a five-step process of ongoing improvement
• Practical implementation techniques to help you get “more of your goal”

Why Attend?
In this interactive workshop, you will have the opportunity to make decisions in a simulated manufacturing environment and compare the results from a “local” perspective to those made from the “global” perspective.

Companies that apply these concepts have seen the following:
• Increased profit margin
• Improvement of on-time delivery
• Reduced chaos throughout the business

Space is limited. Preregistration is required.
