Paylean® 9
Ractopamine Hydrochloride

For Use in Finishing Swine Feeds Only

Net Weight 25 lbs
(11.34 kg)

Type A Medicated Article

Active Drug Ingredient: ractopamine hydrochloride - 9 parts (29.52 mg per pound)

Indication: For increased rate of weight gain, improved feed efficiency and increased carcass lean in finishing swine, weighing not less than 100 lbs, in a complete ration containing at least 1% crude protein for the last 45 to 60 lbs. of gain prior to slaughter.

Directions for Use:

Ingredients: Ground corn.

Note: Follow label directions for use and withdrawal.

WARNING: The active ingredient in Paylean is ractopamine hydrochloride, a beta-adrenergic agonist. Individuals with cardiovascular disease should exercise special caution in using Paylean, but for use in hypothalamic (TIDA) function of the pituitary gland. The Paylean® Formulation (Type A Medicated Article) gives a lower dust potential under usual conditions of handling and mixing. When mixing and handling Paylean, take precautions, including clothing, protective eyewear, and a NIOSH-approved dust mask. Operations should be done thoroughly with soap and water after handling. In accidental eye or nasal exposure, immediately rinse eyes thoroughly with water. In irritation persists, consult a medical attention. The material safety data sheet contains more detailed occupational safety information.
