One of your students has the opportunity to participate in an exciting educational opportunity. The 4-H Connect Retreat is a 4-H Youth Development program event for youth in grades 8-11, on April 26-28, 2019.

Youth who participate in this event will be given the opportunity to explore Iowa State University and the variety of educational programs that are offered by Iowa 4-H. They will participate in campus and camp activities in each of our four educational priority program areas: STEM, civic engagement and leadership, communications and the arts, and healthy living.

Each participant has selected an ISU college to tour, which will consist of a half-day of hands-on educational activities designed and presented by our ISU campus partners and student ambassadors. Keynote and capnote speakers will discuss leadership through cultural perspectives.

This retreat is an amazing educational experience for a select group of outstanding young people. Please excuse the student listed from class and assist them in arranging for this absence from school in order to take full advantage of this opportunity.

If you have any questions about this educational event, please feel free to contact me.

Thank you,
