

CCP payment yields. If a crop was not planted in a particular year, then enter NP (not planted) in the corresponding cell; if a crop was planted or considered planted but no yield information is available, then enter ND (no data).

The worksheet calculates the updated payment yields as the historical average of the highest of 90 percent of the farm yield or 75 percent of the

2008-2012 average county yields. If the updated payment yields are higher than the CCP payment yields, then it makes sense to update the farm's yield information.

The first worksheet within the decision tool shows information for an example farm. The decision tool has multiple worksheets to allow a user to enter data for up to five farms.
