
Livestock Enterprise Budgets for Iowa – 2022

Ag Decision Maker

File B1-21

This publication contains estimates of production costs for common livestock enterprises in Iowa. Estimates are intended to reflect average or above-average levels of management using common types of technology. Input prices reflect expected average price levels during the year.

Data were drawn from farm record summaries, feed consumption research, and price projections and are intended to be used for planning purposes only. For individual farms, expected costs and input requirements based on past results should be substituted whenever possible.

Each budget contains estimates of the following types of costs:

Fixed Costs. Costs that will occur regardless of the level of production each year. They generally include such things as depreciation, interest, taxes, and insurance on facilities, breeding livestock, and livestock equipment and facilities. Depreciation is assumed to be 8% of the original value of facilities and equipment annually. Interest averages one-half of the original value of facilities over its lifetime, or 5% annually. Taxes and insurance add 1% for a total of 14% of the original investment annually for fixed costs.

Variable Costs. Costs that vary according to the level of production. Interest is calculated on feed and other variable costs for one-half of the production period.

FM 1815 Revised July 2022

Livestock Budget Price Assumptions

The budgets in this publication are based on the following price assumptions for inputs.

	Price	Units
Corn	\$7.12	bushel
Corn silage	85.44	ton
Alfalfa hay	163.00	ton
Alfalfa-brome hay	135.00	ton
Haylage	45.00	ton
Unimproved pasture	60.00	acre
Improved pasture	85.00	acre
Soybean meal (48%)	0.22	pound
Dried distiller grain	0.11	pound
Modified distiller grain	0.06	pound
Lamb supplement/mineral	0.16	pound
Sow and pig vitamin/mineral	0.50	pound
Hog vitamin/mineral	0.32	pound
Beef supplement/mineral	0.23	pound
Feeder pig (40 pounds)	41.47	head
Weaned feeder pig (12 pounds)	45.00	head
Yearling steer (700-800 pounds)	1.55	pound
Steer calf (500-600 pounds)	1.85	pound
Heifer calf (400-500 pounds)	1.75	pound
Feeder lamb (70 pounds)	2.00	pound
Operating capital	8.00%	year

^{a/} Feed efficiency varies considerably depending on environmental temperatures, disease level, ration fed, quality of management, and death loss. The feed requirements here are for hogs with good performance under excellent management. These figures assume zero mortality; correction for mortality is made when you complete the worksheet on pages 7 or 9.
