There will be a show clinic for all those interested in learning more about showing your animal on Thursday, July 29th at 1:00pm in Paul Barger. ALL BEEF WILL BE DOUBLE TIED - HALTER PLUS CHAIN OR STRAP. These should be checked to make sure they are strong enough to control animals.

D. Weight classes are established by the weight at fair weigh-in. All beef breeds, including crossbred, will be exhibited together in these classes. Anytime there are 5 or more animals of one breed, they will be shown by breed.

E. The fair weight of the animal will be determined at the fair weigh-in. The minimum exhibiting weight is 850 pounds for steers and 800 pounds for market heifers. Any animal lighter than that will be placed
in a feeder class not eligible to compete for grand champion. Exception to this is specialty market beef such as Lowlines and Scottish Highlander.

F. Rate of gain will be calculated for all market animals. Minimum rate of gain will be 2.25 lbs. Exhibitors will be given Rate of Gain cards that must be worn in the show ring with each market animal. If you fall below the 2.25 rate of gain you will place one ribbon lower.

G. Any artificial means of removing or remedying physical defects or conformation in animals exhibited will be considered as fraud and deception. (This includes painting, dyeing, or use of color agents, surgical removal of excess brisket or dewlap, or filling with oil, etc.) Individuals in violation of this will be prohibited from showing and receiving awards on that animal.

H. Judging will take place Saturday, July 31st, 9:00 AM, in the Pullin-Simonsen Arena. Showing order is the same as class order.

DESIGN ELEMENTS & ART PRINCIPLES
Should be included in the Goals Folder for the following Projects: Home Improvement, Visual Arts and Clothes

Design Elements are characteristics of everything and are always present. They appear in flowers, books, chairs, shirts, etc. When you describe something, you use words that tell about the color, texture, line, shape or form, and space. Following is a more detailed description of each element.

Color/Hue-Refers to the name of the color such as red or green. Value tells the lightness or dullness of the hue. Colors opposite each other are complementary colors.

Texture-The feel of the surface such as smoothness or roughness, or the look of the surface such as shiny or dull.

Line-The edge or boundary of an object. Lines can be horizontal, vertical, dotted, zigzag, curved, diagonal, fine, or bold. Lines show directions, divide a space, and communicate feelings.

Shape or Form-Shapes are made by connecting lines. Words like circle, square, triangle, or free form are words used to identify shapes. Shapes are two dimensional where forms are three dimensional. Forms may be balls, cubes, or pyramids. A drawing is a flat shape.

Principles of Design are how the elements (line, shape, color, texture, and space) are put together.
Rhythm—organized movement. It allows the eye to move from one part of a design to another. Rhythm is created by repeating a color, shape, line, space, or texture. It can also be created by varying the size of objects, small to large, or a progression of color.

Balance—The placement of visual weight to create a feeling of balance. Balance may be formal, informal, or radial.

Proportion—Refers to the relationship between one part of a design to another or to the whole. It is a comparison of sizes, shapes, and quantities.

Unity—The feeling that all parts of a design belong together. Lines and shapes that repeat each other show unity. Colors that have a common hue are harmonious. Too much unity can sometimes be boring.

Emphasis—The point of interest in a design. Emphasis is the quality that draws your attention to a part of a design. Some ways to create emphasis are using contrasting color, using different or unusual lines, making a shape very large or very small.

10355 Visual Arts – Design, Process, or Technique Exploration
10360 Visual Arts – Other Visual Art Ideas/Topics

10350 Visual Arts Original Art- An exhibit that shows learning through creation of original art. Original art is a one-of-a-kind, non-replicable design of your creation. By using one medium or a combination, an individual creates an authentic work of art that is not recognizable as another's work. You must explain the application of the most relevant design element(s) and art principle(s) featured in this exhibit. Describe your inspirations, reasons, feelings, and/or motives for creating this work of art.

10355 Visual Arts -Design, Process, or Technique Exploration — This exploration class emphasizes process and provides an individual the opportunity to explore a medium, practice a skill, or study and apply elements and principles of art and design. An explanation of the application of design elements or art principles used when making the exhibit must be included. This exhibit may be an object, portfolio, display, poster, or organized sketchbook. If a non-original design source is used, its origin (where the idea was found, any pictures, sketches, etc.) must still be credited, acknowledged, or have copyright permission obtained. See visual arts special rule #5.

10360 Visual Arts - Other Visual Art Ideas/Topics — Exhibits might include the study and research about an individual artist, style, craft, business or marketing process, planning group tour, career options, etc.

By separating the Visual Arts classes is a return to a previous class structure. The changes will help members better determine the specific goals for the exhibit as to whether the artwork is an original creation or the learning of a process or technique. It will also help judges better understand the member intent as they evaluate the exhibit. The “Other Ideas” class allows for exhibits about visual art topics that are not necessarily an art item or object.
1. **Exhibits made from kits or preformed molds will not be accepted.** Exception: Preformed molds (greenware, whiteware) may be used to provide the appropriate surface for a process technique or application of original design.

3. **If the exhibit is a finished art object, information must be included explaining the application of design elements and art principles used in creation of the work.**

4. **Original works of art must be a creative expression of a design unique to the artist or represent a significant modification to an existing design to make a new and original statement by the artist.**

5. **Exhibition of derivative works created by a 4-H’er is prohibited without the written permission of the original copyright holder/owner. Use of copyrighted or trademarked designs, images, logos, or materials in 4-H visual arts exhibits are prohibited unless written permission has been obtained from the copyright or trademark holder/owner.** For additional information, see 4-H Exhibit Copyright Information at [https://www.extension.iastate.edu/4h/visual-art](https://www.extension.iastate.edu/4h/visual-art).
