On October 25 the Lester Livewires 4H club took a tour of the Hansen Dairy Farm in Hudson. They learned about dairy farming and milk processing. Following a trolley ride, they got to interact with all of the animals on the farm from petting the cows, bottling the calves, and milking a cow by hand. One of the most fun things to see and do was playing with the kangaroos! After the tour, 4H families got to make butter, watch a video of how the Hansen creamery works, and eat some of Hansen's products including ice cream and cheese curds!
