Market Beef

Now that cattle are weighed in, they need to be identified on 4hOnline. The county extension staff have entered the data onto 4hOnline. First things first, all members who plan to show must be enrolled on 4hOnline otherwise the livestock cannot be identified. Here are the steps to follow if you have not done so already:

· Enroll on 4hOnline with your username and password. If you forgot your password, select the option on the log-in page to send a new password to your email account. If more assistance is needed call the Extension Office.

· When members are enrolled, Extension staff will go in on 4hOnline and input the weigh-in information.

· Next families will need to verify that all data is correct. After logging in it will take you to the Member List which includes all of your family members enrolled.

· Click “Edit” to the right of the member listed to go to that member’s Personal Information Screen

· Locate and click on the Animals/Livestock link to go to your Animal ID screen

· Click “Edit” button to view the information for this animal

· Review all information entered by Extension Staff

Note: there are OPTIONAL fields to list a tattoo and/or birthdate for a heifer that could possibly end up showing as a breeding heifer instead of a market heifer. The tattoo field is important for state fair exhibitors; the birthdate is only important to county fair exhibitors

· Please contact the Extension Office if anything is listed incorrectly

· If everything looks correct, click on the box next to the statement “I verify the information above is accurate”. Be very certain you are approving the correct information! Do NOT verify incorrect information.

· Click on “Save” button to submit your approval. This is your verification and can no longer be edited. · Deadline to complete this process is February 1, 11:59 pm.
