Soil Test Interpretation & Recommendations: Maximizing Return on Investment

The cost of managing soil fertility is changing with the price of fertilizer and the increased demand for crop nutrients with higher crop yields. Understanding soil fertility basics will help you manage crop nutrients better!

Join us to:

- Learn how soil tests are done and what they mean
- Calculate crop removal rates of phosphate and potash
- Understand how field and forage crops respond to different soil nutrient levels
- Discover what research shows about crop response to different soil test levels
- Understand the chances of getting a return on your fertilizer investment when you know your soil test results
- Understand soil management decisions to be a better fertilizer consumer

February 28, 2020
9:00 a.m. to 12:30 p.m.
Lunch served at Noon.

Black Hawk County Extension
3420 University Ave.
STE B
Waterloo, IA 50701

Workshop hosted by Benton, Black Hawk, Butler, Buchanan, and Grundy County Extension.

Presented by Terry Basol and Rebecca Vittetoe, Field Agronomists with ISU Extension and Outreach.

Registration Information and Questions?
Pre-registration is required by February 26. To pre-register if you have questions, contact the Black Hawk County Office at (319-234-6811) or email sheilaw@iastate.edu. Enrollment is limited to the first 30 registrants.

Registration fee of $40/person, and includes publications, copies of the presentation, and lunch.

The fees for service will be used to offset direct expenses and to support the Agricultural Extension program.
