24 Important Words to Know

1. Ambulatory patient services
   a) Health services provided on an outpatient basis to those who visit a hospital or another health care facility and depart after treatment on the same day.

2. Emergency services
   b) Evaluation of an emergency medical condition and treatment to keep the condition from getting worse.

3. Hospitalization
   c) Care in a hospital that requires admission as an inpatient and usually requires an overnight stay.

4. Well-baby & Well-child care
   d) Routine doctor visits for comprehensive preventive health services that occur when a baby is young and annual visits until a child reaches age 21.

5. Prescription drugs
   e) Drugs and medications that by law require a prescription.

6. Habilitative services
   f) Health care services that help you keep, learn, or improve skills and functioning for daily living.

7. Preventive services
   g) Routine health care that includes screenings, check-ups, and patient counseling to prevent illnesses, disease, or other health problems.

8. Wellness services
   h) A program intended to improve and promote health and fitness that's usually offered through the work place, although insurance plans can offer them directly to their enrollees. The program allows your employer or plan to offer you premium discounts, cash rewards, gym memberships, and other incentives to participate.

University of Maryland Extension programs are open to any person and will not discriminate against anyone because of race, age, sex, color, sexual orientation, physical or mental disability, religion, ancestry, or national origin, marital status, genetic information or political affiliation, or gender identity and expression.

9/19/13
9. Chronic disease management

i) An integrated care approach to managing illness which includes screenings, check-ups, monitoring and coordinating treatment, and patient education. It can improve your quality of life while reducing your health care costs by preventing or minimizing the effects of a disease.
