Ultrasound scanning for one (1) head will be *paid for by Cerro Gordo County Cattlemen*. Additional animals entered will be at the exhibitor's expense. This will be paid to Cerro Gordo County Extension and Outreach to cover the scanning fee charged by the technician (approximately \$20 per head).

This carcass information, along with estimated carcass average daily gain and current carcass pricing at fair time (this would include premiums or discounts for quality grade, yield grade, and estimated carcass weight), will be used to determine a carcass value per day on feed. Animals entered will be ranked from highest value to lowest value.

The following formulas will be used to calculate carcass value per day on feed:

Percent Retail Product is calculated as follows:

$$(65.69 - (9.931 \times \text{fat thickness}) + (1.2259 \times \text{rib eye area}) - (.013166 \times \text{carcass weight}) - (1.29 \times \% \text{ kidney, pelvic, heart fat}))$$

Carcass Value Per Day on Feed is calculated as follows:

$$((\text{Hot carcass weight} - (.55 \times \text{beginning live weight}) \times \text{percent retail product} \times \text{contest carcass price as determined by appropriate grid}))/.64/\text{days on feed}$$

6. Up to 10 animals ranking the highest on value per day on feed will be exhibited live at a designated time during the market beef show. Placings and all results will be announced and released at that time.

Premiums will be distributed as follows. *If there are not 10 entries, the superintendent and the Cerro Gordo County Cattlemen representative will determine distribution of premiums.*

- Have you researched the theme enough to support the headline with accurate body copy and appropriate visuals?
- Is the headline large enough or positioned on the poster so that it grabs the audience's attention? (On a 14 x 22-inch poster, the letters of the theme should be 1 1/2 to 3 inches high and 1/4 to 1/2 inch thick.)

- Is the visual **original**, simple, compelling, to the point?
- Does not include any copyright design or material.

- Does the poster have a strong center of interest?
- Is the headline, visual and body copy (the three elements) balanced? (Layout balance is achieved by positioning the headline, visual and body copy and using blank spaces round those elements.)
- Does the poster use color, texture, shape and size in a pleasing combination?
- Can the poster, as assembled, withstand long periods of display?

Overall Poster Appearance

- Does your poster attract attention, focus interest on the theme, sell your audience on taking action?

Instruction on obtaining permission to use copyright materials

Often, we get “ideas” by observation of other’s works of art, crafts, recipes, etc. It is very important to give credit to those individuals or companies who have created materials, resources, logos, trademarks, photographs, etc. that you may want to incorporate into a 4-H exhibit for a county fair. In many cases requesting permission can do this.

The next page provides a sample letter, which you should modify to meet your need. This permission is needed when an item made by you is going to be on public display. **Getting permission to use someone’s work often takes a long time. Act today.**

You will want to send two copies of your letter to the person or company from whom you are requesting permission. They will keep one copy and return the other to you. You should also send a self-addressed, pre-stamped, envelope to aid in their convenience to respond to you. **Remember they do not have to grant you permission, but if you explain fully how you plan to use their work, they are more likely to grant permission.**

It is important to remember that giving credit to someone else is very important in any area of your work. In written papers, it may be using footnotes; with exhibit items, credit and permission are included in the accompanying folders. As you put your ideas together, be sure to keep a list of where you get your ideas. If it is a book, magazine, or other printed material, include the name of the publication, the issue, volume, year, and page number from which it was taken. This type of documentation supports your efforts to give credit to the original individual or source.

Remember, when in doubt, ask permission.

Use of the 4-H Name and Emblem

Did you know the 4-H clover is one of the most widely recognized symbols in the United States? Did you also know the 4-H clover is an emblem that is protected under the United States Code? 4-H members and clubs do get to use the clover, but there are guidelines to follow.

The official 4-H Emblem is a four-leaf clover with a capital “H” on each leaf. The stem of the clover slants to the right. If there are no “H”s on the leaves, it is just a clover and you can do what you want. If the “H”s are there, here are some basic things to keep in mind:

1. You should always use the whole 4-H Emblem. Please don't remove any leaves or the stem.
2. Don't put anything on top of any part of the 4-H Emblem.
3. The 4-H Emblem should not be screened under words or graphics.
4. Please keep the upright as it is used. It should not be turned on its side or turned upside down. (While there are some exceptions to this in the 4-H fabric that can be purchased in stores, special permission was given from National 4-H Headquarters for this.)
5. It is preferred that the 4-H Emblem be in green with white or gold “H”s.
6. Please do not distort the 4-H Emblem to fit a given space.
7. Below the right lower leaf, “18 USC 707” does need to be there. This is part of the United States Code under which the 4-H Name and Emblem is protected.
8. The official name is “4-H” and is always the numeral “4” separated from a capital “H” with a hyphen (not a dash, slash, or space).

The Language of Art

DESIGN ELEMENTS AND ART PRINCIPLES FOR 4-H EXHIBITS

Art is created through experimentation using a variety of tools and organizational strategies. The tools of art are not just brushes, paints and palettes, but rather elements of design. How the tools or elements are used or organized creates the principles of art and design. Elements of design and principles of art are the core vocabulary of art. Think of them like a recipe to create your work. The elements are like the ingredients and the principles are the instructions. By using elements, you create principles such as ‘By repeating lines I created rhythm.’

Most works use the majority of the elements or principles in some way in the exhibit, but they don't have to use all of them. When discussing what you did and learned, go beyond listing which ones were used and explain how they were used. For example, explain “I used a bright intensity of the color red and sharp diagonal line to express anger in my painting.” Focus on using the most relevant terms for your specific exhibit.

Design Elements

- Line can be horizontal, vertical, diagonal, or curved. Lines can vary in thickness or help create a mood.
- Shapes are made from connected lines. How they are arranged determines the design. They can be geometric or organic.
- Color is described with the words hue, value, and intensity. Hues are names of colors. Value is lightness or darkness of a hue. Intensity refers to the brightness or dullness of a hue. Light, intermediate, and dark values define parts of objects and set off one area of a design from another. Has a color scheme been followed?
- Texture is a surface characteristic that can be touched or seen. Contrasting textures add interest.
- Space is divided into negative and positive areas.

Art Principles

- Rhythm is organized movement. Repeating an element (i.e. lines) will produce rhythm.
- Proportion compares the amount, size, or number.
- Emphasis captures your attention by unusual use of line, shape, texture, space, or value.
- Balance gives a design stability.
 - Radial balance -- same around a center point;
 - Asymmetrical balance -- dissimilar;
 - Bisymmetrical balance -- same on both sides.
 - Unity is the union of the elements in a design.

ELEMENTS OF DESIGN

The most basic parts of design are the elements. These five “ingredients” are needed to create design.

Line

Horizontal, vertical, dotted, zig zag, curved, straight, diagonal, bold, or fine
Line can show direction, lead the eye, outline an object, divide a space, and communicate a feeling or mood.

Shape

When lines connect they become a shape

Color

Described in terms of hue, value, and intensity
Hue is the name of the color.
Value is the lightness or darkness of a color.
Intensity is the brightness or dullness of a color.

Texture

The smoothness or roughness of an object’s surface
Texture can be tactile (you can feel it) or visual (you can see it).

Space

The actual space an object or design occupies
The background space, sometimes called negative space, is important too.

PRINCIPLES OF DESIGN

These five principles are the ways you “mix” the elements together.

Balance

Can be formal or informal
Formal is created when each side of the design is the same.
Informal is created when one side of a design is different than the other.

Rhythm

Forms a path the eye follows

Proportion

The relationship of sizes to each other

Emphasis

Attracts your eye to the most important part

Unity

When a design is complete; all parts belong together
