| Value of animals on hand <br> at end | (From [9] <br> on pg 3) |

Other income

**If you have more than six animals, continue this Gain Records section on another page so you have a line for each animal. *Use this formula to calculate average daily gain (ADG):
a) total gain $=$ final weight minus beginning weight $(\mathrm{Col} 4-\mathrm{Col} 2=\mathrm{Col} 5)$
b) the number of days on feed = the number of days between the date of beginning weight and the date of ending weight (Use a calendar to count number of days between Col 1 and Col 3 , number of days $=\mathrm{Col} 7$.)
c) $\mathrm{ADG}=$ total gain divided by the number of days on feed $(\mathrm{Col} 5 / \mathrm{Col} 6=\mathrm{Col} 7)$
