February 2022

Heart Health Month

February is heart health month. There are 30.3 million Americans or about one-half of all adults in the United States with heart disease. Heart disease includes heart attacks, valve issues, high blood pressure, abnormal heart rhythm, and stroke.

Luckily, we can lower the risk of heart disease by achieving and maintaining a healthy weight. We can work toward this goal by being physically active and eating a heart-healthy diet. There are many benefits to regular activity and a healthy diet. These include:

- Increased energy
- Enhanced mood
- Fewer joint and muscle pains
- Better blood pressure control
- Improved blood flow
- Lowered risk of chronic disease like heart disease and diabetes
- Reduced cancer risk

Move your body throughout the day. Aim for 30 minutes of activity every day. This can be split into 10-minute bouts with just as much benefit. Movement as simple as walking around the house, sorting laundry, and dancing help keep your heart happy and healthy!

Use MyPlate to help plan nutrient dense meals and make heart-healthy food choices. Using MyPlate will help you eat a variety of nutrient dense foods. Limit foods high in sodium, saturated fats, and added sugar.

Fruits and Vegetables on a Budget

In the winter, the cost of fruits and vegetables seem to skyrocket. This is because many are out of season. More budget-friendly options are frozen, canned, or dried fruits and vegetables. They are just as nutritious, easy to prepare, and equally tasty.

**FROZEN:** Frozen produce usually have more nutrients since the fruits and vegetables are harvested at their peak. They are also ready to eat, so all you need to do is cook them.

**CANNED:** You may avoid canned produce because of the added sugar or sodium. However, they still provide great nutrition. Choose the low sugar or low sodium varieties or simply rinse them with water before eating. These are also easy to prepare and chew!

**DRIED:** Dehydrated fruits and vegetables are just as healthy as fresh ones and a longer shelf life. However, the serving sizes are small, making them better as a snack or extra flavors in meals.

**Savory Collard Greens**

Serves: 4 | Serving Size: 1 cup

**INGREDIENTS**

- 2 slices bacon (chopped)
- 1/4 cup onion (chopped)
- 1 tsp garlic (minced)
- 1 28 ounce can collard greens (drained, rinsed, dried)
- 1/2 cup water
- 1 tsp granulated sugar
- 2 tsp hot sauce (optional)
- 2 tsp white vinegar

**INSTRUCTIONS AND TIPS**

1. In a medium sized pan, add chopped bacon pieces and cook over medium heat until crispy.
2. Add onion and garlic. Cook for 3 minutes. Then remove excess bacon grease.
3. Pour in the drained can of collard greens, water, sugar, hot sauce (optional), and vinegar. Stir well.
4. Continue to cook over medium heat until hot. Stir frequently.
5. Serve and enjoy!

**Tip:** Great source of fiber!

**Storage:** Keep refrigerated in an airtight container for up to 4 days.
