**Speakers**

**Kevin Janni** is a professor and Extension engineer in the Department of Bioproducts and Biosystems Engineering at the University of Minnesota. He joined the department faculty in 1980. He works closely with both the Dairy and Poultry Extension teams. He has written extensively on ventilation, air quality, heat stress, odors, biofilters and biosecurity associated with animal agriculture. He teaches an air quality and pollution control engineering course.

**Kim Clark** is a Dairy Extension Educator at the University of Nebraska-Lincoln. She joined Extension in 2015 and rebuilt the Nebraska dairy extension program and works closely with dairy producers. Her focus is on calf health and nutrition and animal welfare. Kim is a Dairy FARM evaluator and PAACO Dairy Stewardship certified.

**Jim Salfer** has been a Regional Extension Educator – with University of Minnesota Extension for the past 22 years. Jim has been involved on farm research projects studying robotic milking systems and automatic calf feeders. The focus of his education program has been to help farmers and other industry professionals understand the major factors driving dairy farm profitability and develop management strategies to improve profitability.
