MIDWEST DAIRY DAY

**Advanced Calving Clinic for Dairy and Beef**

Thursday, Dec. 6
10 a.m. - 3 p.m.

www.iowadairycenter.com
MIDWEST DAIRY DAY: ADVANCED CALVING CLINIC FOR DAIRY AND BEEF

Iowa State University Extension and Outreach, the Northeast Iowa Dairy Foundation and Northeast Iowa Community College (NICC) partner to offer the annual Midwest Dairy Day. This year’s event provides sessions on advanced calving, including a unique opportunity for a hands-on experience with a life-sized cow model. Participants follow one of two event tracks: dairy or beef. Midwest Dairy Day is open to all dairy and beef producers, students, and industry professionals.

This program is supported by local businesses and is free of charge.

Seats are limited and fill quickly; registration is required by Wednesday, Nov. 28.

Call 800.728.2256, ext. 399 to register today.

REGISTER TODAY. 800.728.2256, ext. 399  iowadairycenter.com

HANDLING DYSTOCIA WITH FROSTY
Caitlin Wiley, D.V.M., Clinical Assistant Professor
During this hands-on session Dr. Wiley will share tips and tricks to help ease calving season and difficult calvings. She will use “Frosty”, the life-size cow model, to demonstrate various techniques to simplify pulling malpresentations to result in more live calves.

FIRST AID FOR THE COW AND CALF
Kia Knutson, D.V.M., Postville Vet Clinic Veterinarian
Dr. Knutson will demonstrate ways to provide first aid to both cow and calf around the time of delivery. Providing emergency care before a vet can arrive helps to ensure a healthy start and reduce fresh cow incidences.

NEONATAL CALF CARE
Grant Dewell, D.V.M., Iowa State University Extension and Outreach Beef Veterinarian and Associate Professor
Jenn Bentley, Iowa State University Extension and Outreach Dairy Specialist
Dr. Dewell and Bentley will discuss colostrum management, first day care and vaccine protocols.

SUCCESSFUL TRANSITION – STACKING THE DECK IN THE COW’S FAVOR
Matt Boyle, D.V.M., Dairy Technical Service Veterinarian with Zoetis
Dr. Boyle will focus on key objective measures that help predict successful transition into lactation.

BEEF COW NUTRITION
Katy Lippolis, Iowa State University Assistant Professor and Extension Cow-Calf Specialist
Lippolis will discuss the challenges that beef cows will experience surrounding calving and how to use nutrition and management to ensure healthy calves, successful rebreeding rates and improved performance.
