

# Leave No Dairy Calf Behind

**Lee Kilmer and Jennifer Bentley**  
**Extension Dairy Specialists**  
**Iowa State University**

# Calf Program Goals

- **Why do this?**
  - **Achieve breeding weight at an earlier age**
  - **Potentially reduce AFC/increase BW@calving**
  - **Increase potential for internal herd growth**
  - **Potentially increase milk yield**
  - **Potentially increase herd life**

# Age at 1st Calving

# How soon after a calf is born do you feed colostrum?

1. Within 1 hour
2. Within 1-2 hours
3. Within 2-4 hours
4. I let it nurse it's dam

Response  
Counter

# What form of colostrum do you feed?

1. Fresh
2. Frozen
3. Refrigerated

Response  
Counter

# How much colostrum do you feed a calf in the first feeding after birth?

1. 2 quarts
2. 3 quarts
3. 4 quarts
4. I let it nurse it's dam

Response  
Counter

# At what age do you wean your calves?

1. 4 weeks
2. 6 weeks
3. 8 weeks
4. 12 weeks
5. More than 12 weeks

Response  
Counter

# How much milk or milk replacer do you feed calves per feeding?

1. 2 quarts
2. 3 quarts
3. 4 quarts
4. More if it's cold

Response  
Counter

### Whole milk needed (qts/feeding, 2x) for 1.6 lb ADG (NRC 2001)

# **Bacterial contamination of colostrum**

- **Feces**
- **Infected quarter or udder**
- **Contaminated collection, storage, or feeding equipment**
- **Bacterial proliferation in stored colostrum (double every ½ hr at room temperature)**

# Timing of Colostrum

# Factors affecting [IgG]

- **First milk volume**
  - > 18 lb < quality
- **Immune status**
  - Exposure/vaccination
- **Length of dry period**
  - 3-4 week minimum
- **Dry cow nutrition**
  - Deficient protein and energy reduce quality
- **Age of cow**
  - 2 yr olds = poorest
- **Leaking**
  - Removal & dilution
- **Breed**
  - Jerseys = highest
    - ~66 [28-115 g/L]
  - Holstein = lowest
    - ~48.2 [20-100 g/L]
- **Season**
  - Weather stress
  - Forage quality

# Housing

**Don't shortchange calves & heifers on space!**

| <b>Age</b>                  | <b>Stalls</b>        | <b>Bunk</b>  |
|-----------------------------|----------------------|--------------|
| <b>24 hr-120 d</b>          | <b>min. 34 sq ft</b> |              |
| <b>120 d-6 mo</b>           | <b>min 40 sq ft</b>  |              |
| <b>6 mo-12 mo</b>           | <b>min 45 sq ft</b>  | <b>18 in</b> |
| <b>12mo-18 mo</b>           | <b>min 50 sq ft</b>  | <b>20 in</b> |
| <b>18 mo to pre-freshen</b> | <b>min 60 sq ft</b>  | <b>24 in</b> |
| <b>pre-fresh pen</b>        | <b>min 100 sq ft</b> | <b>30 in</b> |

# Summary

- **Feed high quality colostrum**
- **Feed it quickly after calf is born**
- **Minimize chances for bacterial contamination**
- **Feed more colostrum than traditional practice**
- **Fresh or frozen beats refrigerated colostrum**
- **Increase feeding amounts in colder weather**
