Conference Committee	1
Sponsors acknowledgement	2
Program	7-9.
Dairy beef Production: Past, Present & Future. <i>Kenneth Eng</i>	11-15
Protein and energy nutrition of the neonatal calf. <i>Drew Vermeire</i>	17-44
Practical economics of “Accelerated” calf feeding programs. <i>Howard Tyler</i>	45-52
Efficacy of on-farm pasteurized waste milk systems on Upper Midwest dairy farms and custom calf rearing operations. <i>Matt Jorgenson, Pat Hoffman, and Andy Nytes</i>	53-60
Manipulating forage-to-concentrate ratios to enhance performance and carcass traits of Holstein steers. . <i>Alfredo DiCostanzo</i>	61-75
The evaluation of distillers co-products in dairy-beef production. <i>Allen Trenkle</i>	77-87
Fat and protein supplementation of calf-fed Holstein steers. <i>Richard Zinn, L. Corona, and A. Plascencia</i>	89-93
Wet calf housing and management. <i>Hugh Chester-Jones</i>	95-105
Managing heat and cold stress of feedlot Holstein steers. <i>Simone M. Holt and Robbi H. Pritchard</i>	107-120
Impact of grain processing and quality on Holstein steer performance. <i>Fred Owens</i>	121--140
Intake management. <i>Sheri Steffen</i>	141-149

The effect of Optaflexx® on growth, performance, and carcass traits of calf-fed Holstein steers fed to harvest: A summary of four post-harvest approval studies. <i>Gary J. Vogel, Angel A. Aguilar, Aubrey L. Schroeder, William J. Platter, Scott B. Laudert, and Michael T. Van Koevering.....</i>	151-160
Comparison of dairy versus beef steers. <i>Steven R. Rust and Cassie S. Abney.....</i>	161-174
Supply of dairy beef steers in the future: Status of crossbreeding and sexed semen. <i>Kent Wiegel.....</i>	175-183
Grazing Holstein steers: An alternative to the calf-fed model. <i>Jeff Lehmkuhler.....</i>	185-197
Feedlot closeouts for Holstein steers. <i>Tom Peters.....</i>	199-205
Understanding the market for Holstein steers. <i>Kenneth H. Burdine, Leigh J. Maynard, and A. Lee Meyer.....</i>	207-225
So you want to raise Holstein steers: Will it Pay. <i>Robert Tigner.....</i>	227-236
Dairy beef implant strategies: The benefit of TBA-containing implants for Holstein steers. <i>Court Campbell.....</i>	237-246
Cattle growth dynamics and its implications. <i>Chris Reinhardt.....</i>	247-261
Facilities for feeding Holstein and beef cattle. <i>Steven Rust.....</i>	263-270
My experience with monoslopes. <i>Trent Linkemeyer.....</i>	271-283.
Remodeling dairy barns for dairy beef housing <i>David Kammel.....</i>	285-298
Thursday, November 3rd.	
Cattle market situation and outlook. <i>John Lawrence.....</i>	299-304

The role of immunoglobulins in systemic and intestinal immunity of neonatal calves.	
<i>Jim Quigley</i>	305-317
Managing disease challenges in Holstein steers.	
<i>Mike Apley</i>	319-326
Dr Schnepfer's guidelines for raising healthy calves.	
<i>Russ Schnepfer</i>	327-328
Long haul colostrums deprived calves. .	
<i>Russ Schnepfer</i>	329-332
Calf psychology and stress.	
<i>Russ Schnepfer</i>	333-335
Yield and quality of Holstein beef.	
<i>Daniel M. Schaefer</i>	337-347
Working with animal identification technology providers	
<i>Michael Coe</i>	349-355
Appendix	357-378
Calf Environment and Housing	
<i>Dave Kammel and Brian J. Holmes. 2003</i>	
Does housing method influence calf behavior?	
<i>Jim Quigley</i>	
Housing and behavior revisited.	
<i>Jim Quigley.</i>	
Growth and health of calves housed on different bedding types.	
<i>Jim Quigley.</i>	
Tables summarizing examples of implant strategy studies	
<i>Jon Beckett, Implant Strategies: Panel A Discussion</i>
