**3. Quality of individual pictures**

Checking vertically in the table on page 1, you can tell which are your more successful pictures. The picture with the most (+) is your best picture, the one with most (-) needs the most improvement. Stack your pictures in order of merit, with your best picture on the top and your picture needing the most improvement at the bottom.

**4. What I have learned from this exercise**

So far you have evaluated your pictures (for exposure, focus, lighting, distance, and composition), looked for your most common mistakes, and stacked your pictures in order of quality. Write below what you learned about evaluating pictures from doing these exercises. Also write what you can do to improve your photography skills.
