

Healthy Harvest Supply Chain Study

times indicated along the gray arrows represent actual driving time between the potential processing/aggregation & production site and the furthest away production locations in all directions

Potential Processing / Aggregation & Production Site

- large site offers a variety of opportunities to support production and a processing/aggregation facility
- existing structure may be a possibility for use in processing and aggregation
- located just off HWY 18

Potential Production Site

- 7 acres available for production
- near high school; potential to have program connection
- neighboring site to the west could become an additional public project to bring attention to the area
- located on HWY 18
