

Exhibit Goal Sheet

Use this sheet to accompany your fair exhibit on judging day. After fair include this sheet with your project record keeping for project completion recognition. This sheet is also available from the website at: http://www.extension.iastate.edu/hancock/hancockcounty_districtfair

Project Area: Woodworking

Class: 10620

Grade Just Finished:

Name: Example

Club:

Current Year: 2019

Years enrolled in project including this year:

My goal: What did you plan to learn or do?

- To learn how to use different woodworking tools
- To learn how to measure
- To learn how to assemble the wood into a project

What I did in achieving my goal (in steps): What steps did you take to learn or do this? What decisions did you make in accomplishing your goal?

1. Reviewed the pattern and what cuts I needed to make first
2. Learned about shop safety and how to use the miter box saw and table saw.
3. Cut the boards to the right length based on the instructions. We reviewed a few instruction modifications that were made because of the materials we had.
4. Learned how the "stair step" boards were measured and cut out for us by the instructors.
5. Learned how to use the nail air gun to assemble parts of the project and how to line everything up to assemble it.
6. Used the drill to make small holes and the put in the screws that held the back of the project on.

What I learned: What were the most important things you learned?

Where to safely place my hands when cutting wood with the miter box saw and the table saw
How to measure a board when you need to cut angles into it.

Which parts of the project need to be assembled first and how to hold it with a partner to make sure everything is square.
