

MAKERS SPACE WORKSHOP

FEBRUARY 17TH, 2017
@ JACKSON COUNTY EXTENSION OFFICE

Are you a Maker?

Making is all about tinkering, building, experimenting and collaborating to solve problems. It can mean taking things apart and putting them back together. It can mean linking science and art to build structures. It's about seeing familiar objects in new, innovative ways.

Join us for a day to use your creative side and be a Maker! We will be trying out all different kinds of tools— sewing machine, soldering iron, miter saw, drill, darning needles; and materials – plastic, cloth, wool, metals, and so much more!

The *morning session* will be learning about the tools and different materials as well as having an opportunity to try them all out and work on their projects. Youth may stay for the *afternoon open session* to have work time for whatever they'd like.

**REPURPOSE A SHIRT &
SEW A PILLOWCASE**

SOLDER METAL

FUSE PLASTIC

**ANYTHING YOU
CAN IMAGINE!**

WHAT SHOULD YOU BRING?

Sack lunch if you are staying for the afternoon session, your own projects to work on during open time, a mind ready to learn, create, and have fun!

*Registration & payment due
by February 13th to secure
your spot!*

Name: _____
