

Oaknoll Gardening Project

For the second year the Oaknoll project was very low key. There are 13 Master Gardeners participating this summer. A new area was opened up when the Health Center requested help with their courtyard and Ann Ruppenkamp generously offered to step in. Unfortunately, the group was unable to have their two usual gatherings with their pals due to the pandemic and policies at Oaknoll. The spring program and the fall thank you lunch have once again been cancelled. The residents are very appreciative of the help and the gardens and grounds look progressively better every year.
