

ISU MUSCATINE ISLAND RESEARCH FARM SAND PRAIRIE CLEANUP DAY

October 12, 2019 9:00am

There is a remnant sand prairie on the south edge of the farm near the railroad tracks. Our goal is to preserve this area and use it as a research and learning tool for years to come. Currently, this area is degraded by cedar, sumac, and elm trees. We wish to cut out these trees before they spread further throughout the area. After being cut, we will haul the trees to our burn pile.

All of the required tools will be provided. We will have some work gloves, but it is recommended that you bring your own. Long pants are also recommended for clothing.

Please e-mail Dominic Snyder at dsnyder@iastate.edu if you plan on attending. We look forward to seeing you there.

October 12th 9:00 am

**Donuts and coffee
will be provided
for breakfast**

**Lunch will also be
provided**

**Volunteer hours
can be used for
Master Gardeners
and Master
Conservationists
required hours**
