Are you an entrepreneur developing new and exciting products? Do you have questions about ensuring the safety of your product? If so, this is the program for you! This course is a two-day program designed specifically to address product development and food safety issues faced by small processors. We will introduce the food science basics, important considerations when developing a new food product, share key elements required for product labeling, and an provide an overview of key regulatory requirements for small and emerging food businesses, such as entrepreneurs and local food processors.

Cost: $40
