Best Practices for Dog Practice

1. We will make sure that all Windows and Doors are open in the Pro-line building while having dog practice. That way we will make sure there is adequate air moving through the building.
2. As much as possible and weather permitted the practice will be outside under the covered area keeping that social distance of 6 feet apart.
3. Participants will be spaced at least 6 feet apart from another participant.
4. Recommended wearing a face mask if going closer than 6 feet of anyone outside of who you arrived with.
5. Wipe down equipment before first practice. From then on only Deb will be touching equipment.
6. Wipe down all light switches, door knobs and Restrooms (Fair Board will be cleaning Restrooms before and after)
7. Family members must stay at least 6 feet apart from other families and or participants. (If you need to step in and help with your own child you can)
8. NO sharing of anything at practice.
