Emerald Ash Borer:  
It has been confirmed in Warren County.  Now what??

Warren County Extension and Outreach in Indianola will host an informational meeting concerning the presence of Emerald Ash Borer (EAB), an exotic, destructive insect of ash trees.

June 11, 2018

At ISU Extension & Outreach: Warren Co.
909 East Second Ave, Suite E
Indianola, Iowa 50125

7- 8:30 pm Public Meeting
For Homeowners and other concerned citizens

Meetings are FREE and no registration is required.  If you have questions, call ISU Extension and Outreach Warren County at 515-961-6237 or email: Cortney Garrington at cortneyg@iastate.edu

You will learn:
• How to identify EAB
• How to identify an ash tree
• Signs of EAB infestation
• Is the tree safe?  Is it a candidate for treatment?
• EAB treatment options
• How spread of EAB is being restricted
• Ash tree replacement options

Presented by:

Dr. Donald Lewis
Iowa State University Professor of Entomology & Extension Entomologist

Mike Kintner
Iowa Department of Agriculture & Land Stewardship (IDALS) EAB Coordinator

The emerald ash borer (EAB) is a small beetle that kills all species of ash trees, including green, white, black and blue. This federally regulated insect has been found in fifty-seven Iowa counties and continues to spread across the state.
