

Emerald Ash Borer:

Confirmed in over half of Iowa's counties. Is Woodbury Co. next?

Woodbury County Extension in Sioux City will host an informational meeting concerning Emerald Ash Borer (EAB), an exotic, destructive insect of ash trees.

October 9, 2017

ISU Extension & Outreach - Woodbury County

4728 Southern Hills Drive

Sioux City, Iowa 51106

7:00 - 8:30 pm Public Meeting

For Homeowners and other concerned citizens

PLEASE RSVP BY OCTOBER 8 AT 712-276-2157

If you have questions, please call ISU Extension and Outreach Woodbury County at 712-276-2157 or email: Kellie Solberg at ksolberg@iastate.edu

You will learn:

- How to identify EAB
- How to identify an ash tree
- Signs of EAB infestation
- Is my tree a candidate for treatment?
- EAB treatment options
- How spread of EAB is being restricted
- Ash tree replacement options

Presented by:

Dr. Donald Lewis

Iowa State University
Professor & Extension Entomologist

Mike Kintner

EAB Coordinator with Iowa Department of Agriculture & Land Stewardship (IDALS)

Lindsey Barney

District Forester with Iowa DNR

The **emerald ash borer (EAB)** is a small beetle that kills all species of ash trees, including green, white, black and blue. This federally regulated insect has been found in fifty-one Iowa counties and continues to spread across the state.
