

Thank you for your inquiry about Soil Testing. Unfortunately, Iowa State University is not taking samples any longer. However, we are working to find some alternative soil testing labs that might work for our patrons. Below are forms for the testing lab we are now using. We recommend that you contact the company and view their webpage with any questions before submitting samples. This is not a company that we have used before so we ask that you research what you think will work best for you. You are welcome to contact us with feedback to help us with suggestions in the future. ISU is also working on compiling a list of other Universities that offer soil testing and hope to have that available in the near future. If you decide to submit samples to a lab and get results back that you need help interpreting please feel free to contact us and we will get you in touch with a specialist that can help you.
