**DARE to EXCEL:**
Creating home environments that help kids succeed at school

Children who are well nourished on a regular basis retain information better, miss fewer days of school, perform better in school, and get along better with friends than children who are not getting the nutrition they need. Children need consistent energy levels throughout their day to stay focused. If children do not have good eating habits, they will have lowered brain function and less ability to perform schoolwork. Children who develop healthy eating habits are more likely to become adults who have healthy eating habits.

Help your child get the nutrition she needs by following MyPlate!

- Make half your plate fruits and veggies
- Make half your plate grains and proteins — go for whole grains and lean protein.
- Switch to fat-free or low-fat (1%) milk.
- Choose low sodium soup, bread and frozen meals.
- Drink water instead of sugary drinks.
- Enjoy food, but eat less.
- Avoid oversized portions.

**PROVEN PARENTING PRACTICES**

- Routines at home help kids learn
- Learning at home helps kids learn at school
- Setting limits with love helps kids learn at school
- Good nutrition helps kids learn
- Physical activity helps kids learn
- Sleep helps kids learn
- Community programs help kids learn at school

... and justice for all. The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, gender identity or expression, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual’s income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA’s TARGET Center at 202-720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250-9410, or call 800-795-3272 (voice) or 202-720-6382 (TDD). USDA is an equal opportunity provider and employer. Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Cathann A. Kress, director, Cooperative Extension Service, Iowa State University of Science and Technology, Ames, Iowa. PM3013c September 2011
How important is a good BREAKFAST?
A good breakfast is key to learning. Children who eat a healthy breakfast are more likely to:
• Meet daily nutrient requirements
• Have better problem-solving skills
• Be more alert
• Miss fewer days of school
• Concentrate better
• Have better hand-eye coordination
• Be more creative
• Be more physically active

What is a good breakfast?
Find a combination of foods from each category in the list below that fits your child’s tastes. Aim to jump start his day with complex carbohydrates, fiber, protein and a small amount of fat.
• Whole grains. Whole-grain rolls, bagels, hot or cold whole-grain cereals, low-fat bran muffins, crackers, or Melba toast.
• Low-fat protein. Peanut butter, lean meat, poultry, fish, or hard-boiled eggs.
• Low-fat dairy. Skim milk, low-fat yogurt, and low-fat cheeses, such as cottage and natural cheeses.
• Fruits and vegetables. Fresh or frozen, 100 percent juice beverages without added sugar, or fruit and vegetable smoothies.

KID-FRIENDLY FALL RECIPES
APPLE and CHEESE SNACK
24 reduced fat crackers
6 sliced cheese squares, cut into quarters
12 thin apple slices, cut into quarters
ground cinnamon

TOP crackers with cheese quarters and apples. SPRINKLE with cinnamon. ENJOY!

How to Encourage Your Kids to Try NEW FOODS
• Be patient. Sometimes it takes offering a new food multiple times before a child will try or like it.
• Be a positive role model. Your children watch what you eat and drink. Make healthy choices for yourself and be willing to try new foods.
• Make healthy options available. Purchase and prepare healthy foods so your kids have opportunities to make healthy choices. Let kids decide what and how much food to take from foods being served.
• Praise children for trying new foods.
• Identify times during the week when you and your children can eat meals and snacks together. Eating together is an opportunity to talk with and enjoy your child.
• Limit foods that are high in sugar, salt, and fat, but do not rule out these foods.
